
APHS 20203

Epidemiology &

Biostatistics

Course Introduction and Icebreaker

Objectives

- 1 Get acquainted with each other
- 2 Become familiar with the syllabus
Mark important dates
Understand the assignments
- 3 Explain the use of statistics and epidemiology in health sciences

About Me

Brad Cannell, PhD, MPH

Professor

Associate Dean for Research

Co-Director, Center for Neurodegenerative Disease

Education

- 1 BA, Political Science and Marketing, University of North Texas

Education

- 1 BA, Political Science and Marketing, University of North Texas
- 2 MPH, Epidemiology, University of Louisville
- 3 PhD, Epidemiology, University of Florida
- 4 Grad Cert, Predictive Analytics, University of Maryland
- 5 Grad Cert, Big Data and Social Analytics, MIT

- Army
- NKIDHD
- LMHD
- FODH
- University of Florida

- **Aging Research**
 - Physical Function
 - Cognitive Function
 - Disability
 - Elder mistreatment

2012 Instructor Community Health UNTHSC	2014 Assistant Professor Biostatistics & Epidemiology UNTHSC	2018 Associate Professor EHGES UTHealth-Houston	2024 TCU
• Theoretical Foundations • Injury and violence prevention • Epi of Aging • Advanced Epi methods	• Intro to Data Management and Statistical Computing	• Introduction to R Programming and Data Management • Epidemiology III	• HCHS 80313: Introduction to R Programming and Data Management • APHS 20203: Epidemiology & Biostatistics

Let's Get to Know Each Other!

Take 30 seconds to introduce yourself.

- 1. Your Name: Create your name card (Big Font Print)**
- 2. Major and minor: What are you studying?**
- 3. Hometown: Where are you from?**

- 4. A Fun Fact: Share one hobby, favorite food, or something unique about you.**
- 5. Your Goals: What do you hope to do after graduation?**

The Syllabus

[Open the course syllabus in D2L](#)

What comes to mind when you hear epidemiology and biostatistics?

Nobody has responded yet.

Hang tight! Responses are coming in.

Epidemiology and Biostatistics

EPIDEMIOLOGY

Studies the distribution and determinants of health and disease

Focuses on causes, patterns, and prevention

BIostatISTICS

Provides tools to analyze and interpret health data

Supports evidence-based conclusions in epidemiology and beyond

The impact of epidemiology and biostatistics

Epi & Stats in Everyday Life: Group Discussion

With your Group Presentation 1 team:

- 1 Share and discuss health topics or issues your group finds interesting (news, social media, personal experiences, or career interests)
- 2 As a group, be ready to share:
 - Why it interests your group, and
 - What kinds of data or health questions it might involve

**This is brainstorming only
— your group is not
bound to this topic for
Group Presentation 1.**
